Hello my name is Brennan Wyatt and I chose Hip Relief because some people have trouble with their hips. For example, my Dad he has hip problems from carrying wood at the sawmill. Other people have hip problems from running like myself.

So my solution is to make a belt with a back pillow, a heating strips and a mini speaker. I also added phone holder and a hip pole that straightens your hip so it won't hurt. There is a MP3 player to listen to music.

I hope everyone likes this invention.
