Wireless Access for Guests

The guest network (WVU.Guest) offers short-term access for non-WVU users for up to 5 days of wireless connectivity.

To Self-Register

1. Select WVU Guest from your device's Wifi list.

- If you are unable to find the network on your device, you may also register at:

https://isepsn1.wvu.edu:8443/portal/PortalSetup.action?portal=guest-portal)

2. Select Click here to register link.

3. Complete the fields.

4. Click Register.

5. If you successfully self-registered, you will be notified by email that your account has been created.

- Click Sign On

To Connect to the Guest Network

1. Enter your **Username,** (usually your email address,) and paste the **Password from**

- If your login doesn't work or you forgot to copy your password. Check your email that you used to register for your username.

- If you are unable to access your email to view your default password, contact the ITS Service Desk at 304-293-4444. Be prepared to provide your account information.

- Click Sign On.

- Accept the use policy.

- As long as you don't take your device out of range of the wireless network or close your device, you should not have to reconnect for 24 hours.

If You Need To Reconnect

1. Select WVU.Guest.
2. Enter your username and password from the login email.
3. Click Sign On.

Note: This service is not intended for WVU faculty, staff, and students. These populations should connect to the WVU.Encrypted network.
